

PROFILE

I’m Shukrana Khan, a passionate and detail-oriented UI/UX Design Engineer and Frontend Developer, deeply committed to crafting intuitive and delightful user experiences. With a strong foundation in user-centered design, interaction strategy, and visual storytelling, I also bring hands-on skills in HTML, CSS, JavaScript, and React to transform designs into functional, responsive products. I believe in the power of thoughtful design and clean code to bridge gaps, drive engagement, and make technology accessible to everyone.

WORKING EXPERIENCE

MIRACLE INFOSYS JBP| InternFeb 2024 -Jun 2024

Project Name - Registration UI

- Designed and developed a user-friendly UI that simplifies navigation and streamlines data updates.
- This feature has been utilized by over 1 million users, saving approximately 20,000 user clicks and significantly improving efficiency.

PROJECTS

Skin Care E-commerce Platform – Web & Mobile WireframesAug 2024 - Oct 2024

- Designed a comprehensive e-commerce platform for a skincare brand, delivering 40+ wireframes for both mobile and desktop views.
- The wireframes captured detailed user flows including product filtering, reviews, subscription models, and personalized skincare recommendations.
- The design approach ensured consistency across devices and supported responsive behavior for varied screen sizes.

Grocery Shopping App – Mobile WireframesFeb 2024 - Mar 2024

- Led the end-to-end design of a user-friendly grocery shopping app, focusing on seamless navigation and intuitive interactions.
- Created over 20 mobile wireframes, covering key user journeys such as onboarding, product discovery, cart management, and checkout.
- Emphasized accessibility, minimal UI, and clean visual hierarchy to ensure a smooth shopping experience.
